Unique  
solid marble  
that lasts forever

# Architectural innovation & distinction in manufacturing.

## Who we are ?

Global Marble Manufacturing company is one of the Global Mining Group companies. GMMC was established in 2018. It is the first and only artificial marble manufacturer in Sultanate of Oman. GMMC is determined in using the latest marble manufacturing technology, to meet the criteria of international standards. GMMC also produces Calcium Carbonate ( $\text{CaCO}_3$ ) using Omani limestone.

As the modern world is achieving new milestones, especially in architectural projects, the market is relying immensely on the industrial marble, which gives the vast options in designs, industrial marble is steadily dominating the international market. Artificial marble is also linked to modern architectural designs in the world of interior design.

# Our Products

## Artificial Marble

GMMC manufactures the best quality Industrial Marble. We use the latest technology for the manufacturing of artificial marble. GMMC is determined in delivering the high quality products to its intended users by not compromising on its quality.

We are the only Omani company to deliver the internationally standard local made artificial marble in domestic and international market.

## ONYX marble

Onyx Marble is one of its own kind. Onyx Marble is one of the most elegant product and is consider as one of the most precious product in world of interior design.

We manufacture the Onyx Marble on demand, it is characterized by its ability to refracts the light to give a modern look for specific uses in interior decoration, and it is one of the manifestations of modern fashion in the world of interior design.

## Calcium Carbonate powder “CaCO<sub>3</sub>”

Calcium carbonate powder is extracted from Omani limestone as a raw material from our own quarries in Dhofar Governorate, and the powder is manufactured separately according to its multiple uses in the manufacture of dyes, plastics, oils, rubber, cement, glass, iron and steel, oil refining, paper, roads, building materials and other industries.

## Features:

**Higher fire  
resistance**

**Higher resistance  
to fluid absorption**

**Luminosity  
Gloss/Glitter**

**Hardness**

**For all internal  
uses**

**ECO-FRIENDLY  
PRODUCT**

**Resistant to  
bacterial growth**

**Slip Resistant**

## Specifications:

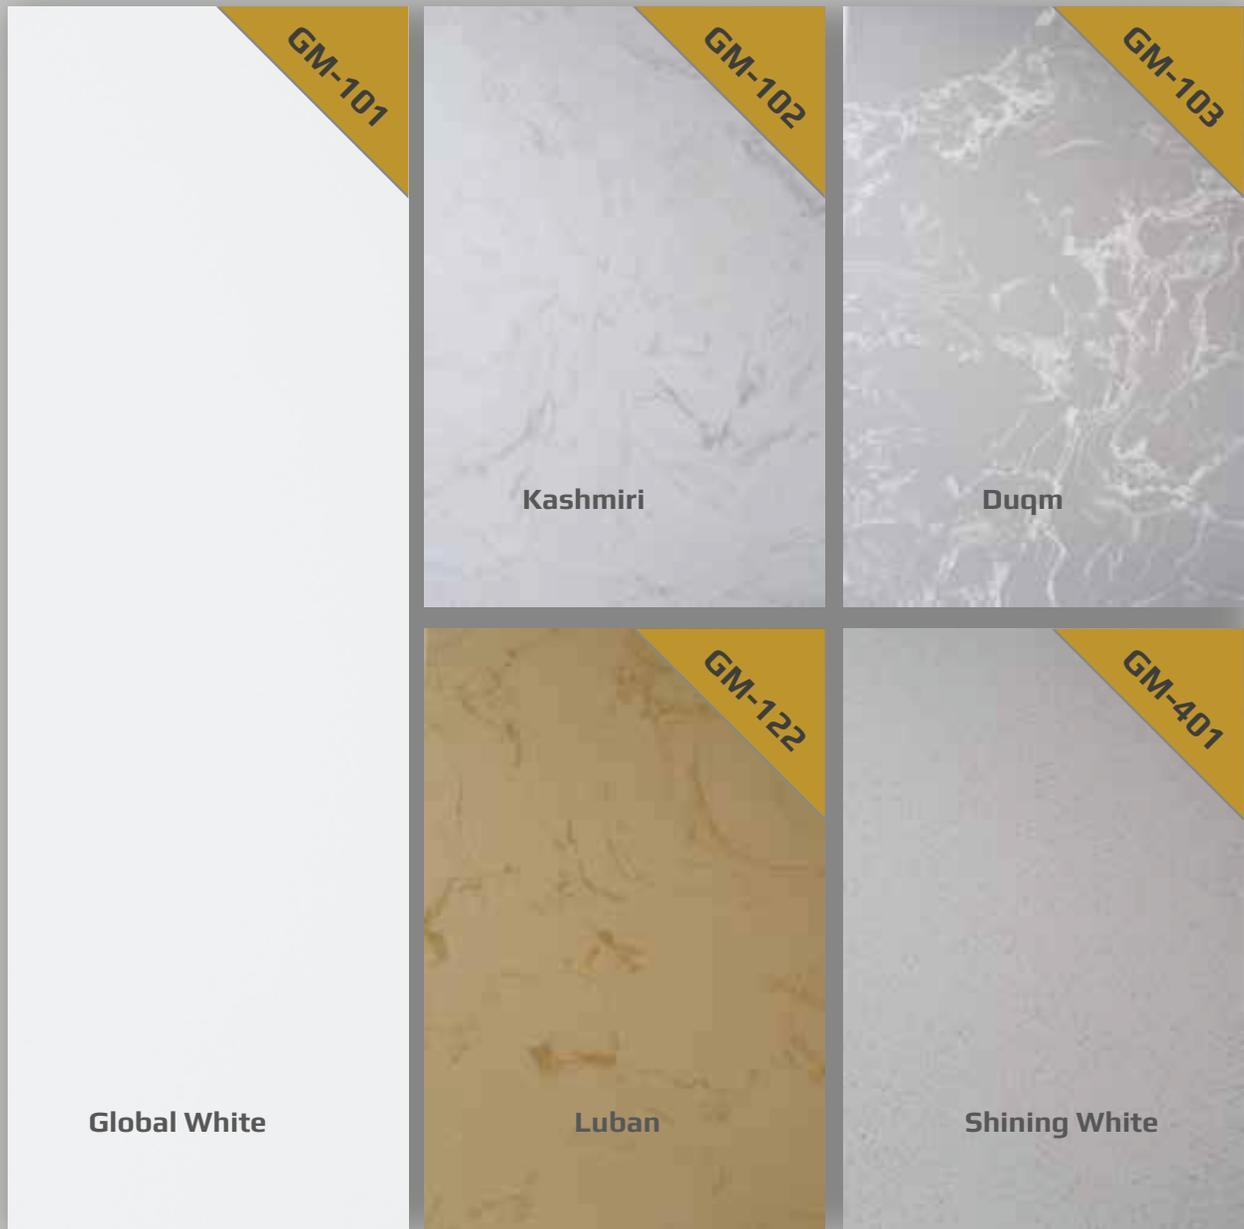

**Thickness:** 1.6 cm, 1.8 cm, 2.0 cm

**Panels size:** 270 cm \* 180 cm

## The Quality:

We work to ensure that our products are characterized by quality and perfection to match the highest standards required in the markets. Our quality team follows the smallest details from the initial stages of manufacturing to the final product, and our customer relation team pays full attention to the opinions and feedbacks of the customers and follow up on the latest developments in the market to keep up with them periodically.
